

Is food safety compliance dragging you down?

Our Story

Azzule and PrimusLabs have developed a series of tools and services to assist our clients. **The Azzule Supply Chain Program** allows you to securely retrieve, manage and send data, **Core Support Services** assists you in managing the additional work load associated with the Foreign Supplier Verification Program (FSVP) and various audit solutions with the **PrimusGFS** audit, the **Primus Standard** audit and the **Azzule Auditing Software**.

Our tools are designed to allow the sharing of food safety data throughout the supply chain so that, once generated, the information required by the FDA or your buyers can be accessed and archived by all participants in the supply chain. The whole system allows tracking of supplier compliance and provides a means for presenting compliance during an FDA, buyer, or third party audit.

AZZULE CAN HELP
