| Finfish, species potentially contaminated with ciguatoxin | Includes all finfish species potentially contaminated with ciguatoxin. Examples include, but are not limited to, grouper, barracuda, and snapper. |
| Finfish, species not associated with histamine or ciguatoxin | Includes all species of finfish not associated with histamine or ciguatoxin. Examples include, but are not limited to, cod, haddock, Alaska pollock, salmon, tilapia, and trout.[2] Siluriformes fish, such as catfish, are not included.[3] |
| Smoked finfish (refrigerated and frozen) | Includes all types of smoked finfish, including cold smoked finfish and hot smoked finfish.[4] |

| Products | Description |
|---|---|
| Molluscan shellfish, bivalves (fresh and frozen)[5] | Includes soft ripened/semi-soft cheeses. Examples include, but are not limited to, brie, camembert, feta, mozzarella, |
| Crustaceans (fresh and frozen) | Includes all crustacean species. Examples include but are not limited to shrimp, crab, lobster, and crayfish. |

FDA defines "Food Traceability List" to mean the list of foods for which additional traceability records are required to be maintained, as designated in accordance with section 204(d)(2) of FSMA.  The additional recordkeeping requirements apply to the foods specifically listed on the FTL, and to foods that contain listed foods as ingredients, provided that the listed food that is used as an ingredient remains in the same form (e.g., fresh) in which it appears on the list.

The above FTL includes the current information included in the final FSMA Rule of products requiring additional traceability records. Consider that FDA can update the FTL if the agency concludes the updates are appropriate so, for upfating information regarding the FTL consult FDA webpage https://www.fda.gov/food/food-safety-modernization-act-fsma/food-traceability-list
