

# Primus Standard Audits

## IPM Addendum

### Checklist 2025

IPM Practices is an optional addendum to the Primus Standard Audits for Farm and Indoor Agriculture operations. It is designed to verify the implementation of Integrated Pest Management (IPM) practices and communicates efforts to any interested customers. The questions in IPM Addendum are independent from the food safety criteria within Primus Standard Audits and do not influence the overall audit score: instead, it serves to enhance the comprehensiveness of the audit.

## Primus Standard Audits – IPM Addendum

Section	Q #	Question	Comments
IPM Practices	1.01.01	Does the operation have a documented integrated pest management (IPM) plan?	
IPM Practices	1.01.02	Does the operation have evidence of implementation of IPM practices?	
IPM Practices	1.01.02a	Does the operation monitor the effectiveness of non-chemical control methods used?	
IPM Practices	1.01.03	Does the operation assess pesticide risk?	
IPM Practices	1.01.03a	Are pesticide applications tied to a documented justification?
